REPORT OF TAX COMMISSION.

DEPARTMENT OF THE
NORTH CAROLINA CORPORATION COMMISSION,
RALEIGH, N. C.

His Excellency, CHARLES B. AYCOCK,
Governor of North Carolina, Raleigh, N. C.

SIR:—We hand you herewith annual report of the State Tax Commission.

Section 7 of the Machinery Act provides that the Board of State Tax Commissioners shall, on or before the 1st day of November of each year, make an annual report to the Governor of this State, setting forth the workings of said Commission during the preceding year, and containing the findings and recommendations of said Commission in relation to all matters of taxation.

The State Tax Commission took and subscribed oath of office on the 20th day of March, 1901, and the same was filed in the office of Secretary of State.

LIBRARY OF CONGRESS
DUPLICATE
EXCHANGE

A pamphlet of instructions was prepared and furnished to each list-taker in the State as soon as practicable, as required by section 17 of the Machinery Act. Notice was given to list-takers and county officers of meetings at the court-house in their respective counties, and conferences were held with them in regard to the enforcement of the Machinery Act and the Revenue Law in as many counties as practicable before June the 1st in the years 1901 and 1902. During the listing periods in each of these years, numerous letters were received and answered concerning the construction and application of tax laws.

After the tax duplicates were made out, abstracts were returned to the Tax Commission from the counties on blanks furnished by the Tax Commission, and these were carefully compared with certificates of assessments by the Auditor and Corporation Commission, and discrepancies were corrected by correspondence or by visit, if necessary, by a member of the Commission.

The value and importance of this work will appear in the matter of bank stock. The Auditor's report for the fiscal year ending November 30, 1900, shows that taxes were paid to the State on bank stock assessed

at $5,052,124, while for the same year taxes were only paid for school and county purposes on $3,755,973. In other words, $1,296,157 of this class of property did not pay any taxes for school and county purposes for that year. Under the present system it is impossible for this to occur, provided the banks and other corporations are assessed and certified before the tax duplicates are made out. This law ought to be amended so as to require central officers assessing corporations to begin their work at any rate by June the 10th, and finish and certify the same by August the 15th of each year. A great many irregularities will occur, and property will escape taxation for school and county purposes, if this is not done.

We are pleased to report that the assessment rolls for the year 1901 show an increase in value amounting to $41,000,000 in round numbers over the preceding year. The revenue derived from taxes on incomes was approximately $20,000, as compared with $5,165 in 1900. Tables showing the whole amount of taxes levied in the State for all purposes, classified as to State, county, township and municipal purposes, with the sources thereof, are furnished herewith. It has been impossible for us to ascertain the "amount lost," or "the cause of the loss," by reason of the fact that settlements have not been had in many of the counties. The counties in which settlements have been made have sent in reports, all of which will be tabulated as soon as practical. The tables are as follows:

STATISTICAL TABLES.

Statements 1 and 26, pages 2, 184:

Totals of abstracts of listed taxables of all counties.

Statements 2 and 16, pages 4, 114:

Aggregate number and value of various subjects listed by counties.

Statements 3 and 18, pages 16, 143:

Taxes collected under Schedules B and C:

Statements 4 and 19, pages 28, 156:

Number of white, Indian and negro polls by counties, amount of property listed for school taxation by each race, and amount of railroad and all property taxed for school purposes in each county.

Statements 5 and 20, pages 32, 160:

Total amount of taxes levied for school and county purposes, and the subjects thereof.

Statement 6, page 40:

Total amount of taxes levied for pensions by counties.

Statements 7 and 23, pages 42, 172:

Indebtedness and tax rate of counties.

Statements 8 and 24, pages 46, 176:

Valuation of property and number of polls listed in towns and cities, with the tax levy, other revenues, tax rate, expenditures, bonded indebtedness and liabilities.

Statements 10 and 26, pages 60, 187:

Total amount of taxes levied for State, school, county and municipal purposes.

Statement 11, page 62:

Valuations and assessment of bank stock, as reported by State Auditor.

Statement 12, page 66:

Building and loan associations, shares of stock, and valuations.

Statement 13, page 67:

Bank stock by counties.

Statement 14, page 69:

Corporations, capital stock, number shares, assessed value, etc., as reported by State Auditor.

Statement 15, page 88:

Corporations by counties.

Statement 17, page 126:

Property valuations by townships.

Statement 21, page 164:

Levy for county taxes.

Statement 22, page 182:

Comparative statement of property values for 1900 and 1901.

Statement 23, page 170:

Average value of lands, town lots and domestic animals.

Statement 26, page 184:

Recapitulation of State, school, county and municipal taxes for 1901; also, total indebtedness of State, county and towns.

The law, section 6, Machinery Act, requires the Tax Commission "to make diligent investigation and inquiry concerning the revenue laws

and systems of other States and countries, so far as the same is made known by published reports and statistics, and can be ascertained by correspondence with officers thereof, and, with the aid of information thus obtained, together with experience and observation of our laws, to recommend to the Legislature at each regular session thereof, such amendments, changes or modifications of our revenue laws as seem proper and necessary to remedy injustice and irregularities in taxation, and to facilitate the assessment and collection of public revenues." We have endeavored to discharge this duty, and respectfully submit the following recommendations:

There should be an exemption of personal property from taxation of $300, instead of $25, as the law now provides. The Constitution, Article V, sec. 5, provides that the General Assembly may exempt from taxation personal property to a value not exceeding $300. Every Legislature since 1868 has exempted certain personal property. At first the amount was $300, and this amount has been reduced until it is now $25, and consists in household and kitchen furniture, wearing apparel and libraries. If any exemption is allowed, it should be $300. There is very little tax-paying ability found in the ownership of this amount of property. It could not earn, if in the shape of money, more than $18 per annum. It is utterly inconsistent that the same revenue law should exempt all incomes except such as are in excess of $1,000, and tax only the excess over $1,000, and allow an exemption in property only to the value of $25; and especially is this so when it is considered that the rate on property is not less than two-thirds of one per cent of its value, and in many places in the State it is 2½ per cent, while the income tax rate is 1 per cent. When the first general *ad valorem* tax law was passed in North Carolina, it was provided that every individual whose estate shall be assessed at $500 or less sum, shall pay no tax thereon, and $500 of the assessed value of the estate of each tax-payer shall be exempt from taxation. (See Laws of 1861, chap. 31, sec. 4.)

We recommend that the poll tax be not levied except as a State and county tax, and that in no case shall the State and county capitation tax combined be greater than $2 a head, and that all laws authorizing municipalities to levy taxes on polls be repealed. The Constitution, Art. V, sec. 1, provides: "The General Assembly shall levy a capitation tax on every male inhabitant of the State over twenty-one and under fifty years of age, which shall be equal on each to the tax on property

valued at three hundred dollars in cash. The Commissioners of the several counties may exempt from capitation tax in special cases, on account of poverty and infirmity, and the State and county capitation tax combined shall never exceed two dollars on the head." The State and county poll tax combined was less than two dollors on the head in two counties in the State, and was two dollars in eighteen counties, and a higher rate in all the other counties, the highest rate being $3.50 for the year 1900.

All of the cities and towns in the State, except two, levied a poll tax in the year 1900, and observed the equation and proportion as required by the Constitution in levying State and county taxes. The State, county and city poll tax rate for the year 1900 in Raleigh was $6.72; Wilmington, $6.65; Charlotte, $6.50; Asheville, $6.50; Durham, $4.98; Greensboro, $6.27; Winston, $6.35.

Under the revenue laws of our State, the tax list in the sheriff's hands has force and effect of a judgment and execution, and it is made the sheriff's duty to levy on any and all property of an inhabitant of the State to satisfy the poll tax, and no exemption is allowed against this execution. The sheriff is required to make an affidavit that he has visited the usual place of abode of the tax-payer, and could not there, or elsewhere in his county, find property of a delinquent on which to levy for satisfaction of his tax, before he can be allowed the same as insolvent. It is also made the duty of the sheriff to garnishee any debt or wage due the delinquent tax-payer. By act of the Legislature of 1897, it was made a misdemeanor, punishable by fine not to exceed five hundred dollars, or imprisonment not to exceed six months, to fail to pay the State and county poll tax. (See chapter 168, section 53, Laws of 1897.) We have never heard of but one indictment under this law, and that was dismissed in the Supreme Court of the State. (See State against Jones, 121 N. C., 616.)

Failure to pay the poll tax due for State and county purposes deprives one of the right to vote under the amended Constitution. That the poll tax can not be collected, even with these most rigorous laws, is strong evidence not only that the tax imposed is beyond the ability of the tax-payer, but that it is so much beyond it that laws can not be framed so strong as to enforce the collection of it. The State Auditor, in his report of 1896, estimated that a fraction over two-thirds of the whites, and a fraction over one-half of the colored males, who were liable for

poll tax, paid it; he estimated that 137,541 males of both races did not pay it. This estimate may have been rather high, but it was probably not very far wrong. There were, in May, 1902, over 50,000 delinquents on account of poll tax for the year 1901. The insolvent list was reduced greatly by the amendment of the Constitution, making the payment of the poll tax a qualification of the right of suffrage. The rule is (there are exceptions, of course) that the poll tax is collected from those only who have property. It is thus an indirect property tax. The law imposing the tax had as well require that male inhabitants between the ages of twenty-one and fifty years, who own property, shall, in addition to the *ad valorem* tax, pay the amount of the poll tax. As an indirect property tax it is unjust, and in many instances oppressive.

It appears from the section of the Constitution quoted above that, in levying the poll tax for State and county purposes, the equation and proportion therein provided must be observed. It also appears from said section, in language just as clear and definite, that the State and county capitation tax combined shall never exceed two dollars on the head. It has been uniformly held that this limitation did not apply to pre-existing contracts. It is a matter of surprise that this limitation should be exceeded in all but twenty of the counties of the State, and the plain letter of the Constitution thus violated. It is not only within the power of the General Assembly and the County Commissioners to reduce tax on polls so that State and county capitation tax combined shall not exceed two dollars, but the Constitution positively requires that this shall be done. Williams against Commissioners, 119 N. C., page 420.

The question as to whether the equation and proportion provided by the Constitution between polls and property for State and county purposes must be observed in levying taxes in municipalities was very elaborately discussed in the case of Jones against Commissioners of Henderson, 107 N. C., page 248, and the Court said: "We think the interpretation we have thus given the several articles and clauses of the Constitution, bearing upon the important question raised by the appellees is the true one, indeed, the only one consistent with their phraseology, terms and purpose, and that renders the whole in a large measure harmonious. We know that it has been stated *obiter* in several cases that the equation and limitation of taxation referred to above must be ob-

served in levying taxes for municipal purposes, but it has not been so decided, certainly not expressly decided, nor can it be, in our judgment, without defeating the true intent reasonably appearing." This is the last declaration of the Court upon this question, and, accordingly, it is settled that while the General Assembly may authorize municipalities to levy a poll tax, the Constitution does not require it.

Compared with the income-tax law now in force, the poll tax levied in many places in the State is very unequal. The law imposes a tax on incomes derived from property not taxed of one per cent on the excess over one thousand dollars. A male inhabitant of the capital city of the State, without any other consideration except that he is between twenty-one and fifty years of age, is required to pay $6.72, or as much poll tax as one who resides in the city and has an income of $1,672 from property not taxed.

Compared with the franchise tax, it is high. On corporations having capital stock of $25,000, a franchise tax of $5 is imposed for State purposes, and counties may impose a like amount. We have compared our poll tax rate with the rate in other States. The Constitution of South Carolina provides that the General Assembly may provide annually for the poll tax, not to exceed one dollar on each poll, but no additional poll tax shall be levied by any municipal corporation. The Constitution of the State of Georgia provides that no poll tax shall be levied, except for educational purposes, and said tax shall not exceed one dollar annually on each poll. The Constitution of Virginia provides that the Legislature may levy a poll tax on every male over twenty-one years of age of one dollar; counties and corporations shall have power to impose a poll tax not exceeding fifty cents per annum for all purposes. The Constitution of Tennessee provides that the Legislature may levy on all males over twenty-one years not less than fifty cents nor more than one dollar, and that no county or corporation shall levy a poll tax exceeding the amount levied for the State. Poll tax is forbidden by the Constitutions of the States of Maryland and Ohio. In a number of States in which it is not forbidden by the Constitution, it is not levied, and in no State is so great a poll tax levied as in municipalities in North Carolina.

We recommend that all statutes which have been passed legalizing, or attempting to legalize, a higher tax rate than 66 2-3 cents on the hundred dollars value for State and county purposes combined, be repealed. We find that in two counties only is the tax rate for State and county pur-

poses less than 66 2-3 cents on the hundred dollars value. In eighteen counties it is 66 2-3 cents, and in all the others it is more than that, the highest rate in any county being $1.26 2-3 on the hundred dollars value for the year 1900. We find that the General Assembly passed laws authorizing these counties to levy this excess over the constitutional limit of 66 2-3 cents. It is claimed that the General Assembly had this power by reason of section 6, Article V, of Constitution, which is as follows: "The taxes levied by the commissioners of the several counties for county purposes, shall be levied in like manner with the State taxes, and shall never exceed the double of the State tax, except for a special purpose, and with the special approval of the General Assembly."

The county tax rate in the county in which the rate was $1.26 2-3 on the hundred dollars value was 83 2-3 cents on the hundred dollars value; the State tax rate was 43 cents on the hundred dollars value—that is to say, the county tax rate is less than the double of the State tax. As section 6, above quoted, authorizes county commissioners to levy a tax not to exceed the double of the State tax, it is pertinent to inquire why the county commissioners felt it necessary to apply to the General Assembly for a special statute to levy a tax which would not exceed the double of the State tax. Evidently, they thought they were bound by a double limitation. Section 1 of Article V, copied above, limited them to the levy of a tax which, combined with the State tax, would not exceed 66 2-3 cents on the hundred dollars value, and within that limit, section 6, to a tax not to exceed double of the State tax. If the county commissioners were limited by section 1, why was not the General Assembly also? Section 1 is a limitation upon both the General Assembly and the county commissioners; section 6 is a limitation upon county commissioners, with power upon the General Assembly to authorize county commissioners to exceed the limit, "the double of the State tax," but, of course, within the limit provided in section 1. There was not a county in the State in 1900 which levied a tax which exceeded the double of the State tax, and, therefore, section 6 is not applicable at all, unless it be contended that this section empowers the county commissioners to levy a tax in disregard of limitations in section 1. If this is so, county commissioners have power to levy the tax by the Constitution and not by the statute. This was the construction placed upon these sections by Judge Rodman, who was a member of the Convention of 1868, soon after the adoption of the Constitution. He said: "Clearly,

it is the duty of the Legislature, in its revenue acts, to observe the equation of taxation, and to keep the State tax not only within the extreme limit, but also so much within it as to allow the counties, by an additional tax within it, to provide for their legitimate needs." (See Appendix, 66 N. C. Reports.) And this is, in effect, the construction placed upon these sections by our Supreme Court in case of Williams against Commissioners, 119 N. C., page 420.

This limit to State and county taxation was not adopted by the Convention arbitrarily; it was, doubtless, done after examination of the revenue laws which had prevailed in this State for the then nearly one hundred years of its history, as well as revenue laws of other States and countries. It will be found that instances were rare, and only for a short time, when any property in this State had, before 1868, ever been taxed at a higher rate than 66 2-3 cents on the hundred dollars value for State and county purposes combined. When tax had been imposed upon income, it had usually not been higher than four per cent of net income. No higher tax had ever been imposed by the United States Government, or by the British Government, than 10 per cent on incomes. A member of Parliament declared that "10 per cent was the natural limit of the income tax"; and, at that time, the income tax had been for many years one of the chief sources of revenue for that government. Sixty-six and two-thirds cents on the hundred dollars value was equivalent to an income tax of over 11 per cent on the income from all property which could not earn more than 6 per cent per annum, and it was equivalent to a tax of over 16½ per cent on the income from all property which could not earn more than four per cent per annum. The Convention concluded that 66 2-3 cents on the hundred dollars value was the "natural limit of the *ad valorem* tax."

In many places in our State there is a tax rate for State, county and municipal taxes as high as $2.40 on the hundred dollars value, and in some places higher than that. Let us see what the levy and collection of this tax would mean. It would mean that each one hundred dollars of property that could not earn more than $6 per annum, must pay $2.40 of this for taxes. There was at one time in this State a large amount of notes which the usury laws would not permit to earn more than six per cent per annum, and there is a great deal of other property which can not earn more. This rate is, therefore, equivalent to a tax of 40 per cent of incomes of all this class of property; and, if the

property can not earn more than 4 per cent, or four dollars on the hundred dollars value, it exacts $2.40 of every $4, or 60 per cent of the income. Is it any wonder that this class of property has disappeared from our tax rolls? This is not the fault of the system—it is the abuse of the system. A tax exacting 40 or 60 per cent of the income as such, when the income is limited by law or by trade and commerce to 6 per cent or less, would never be passed by any General Assembly, and it may be added that it could not be enforced if it were passed, and it matters not in what form—it is "beyond the natural limit of tax." We believe that if it were known that the General Assembly, under no circumstances, would permit the limit of the tax on property for State and county purposes combined to exceed 66 2-3 cents on the hundred dollars value, the tax officers would be greatly aided thereby in enforcing the law and placing all property on the tax list at its true value in money. But it may be asked, what will be done if this will not raise money sufficient to defray the expense of the State and county governments?

Our governments ought to be so managed that it will not be necessary to levy oppressive taxes to support them, and the fact that the tax rate was limited, would encourage economical management, and would compel officers to be diligent in finding and placing all property on the tax list at its true value in money. It is easier to add to the burden of those who are willing than to pursue and subject those who are unwilling to pay. The *ad valorem* tax is not the only source from which the State and county governments can derive revenue. Incomes, trades, professions, franchises, inheritances, etc., etc., may be taxed.

If there were no limitations upon the power of the General Assembly in this respect, we would most earnestly recommend that no statute be passed authorizing a tax levy in excess of 66 2-3 cents on the hundred dollars value for State and county purposes combined. Every time and everywhere this is done, and in proportion as the rate has been increased, there is a tendency to inequality in assessments and to evasions of the law. "The tariff is higher than the traffic will bear."

We would also respectfully suggest that no special statute be passed allowing county commissioners to exceed the double of the State tax within the limit of 66 2-3 cents, without first ascertaining that substantially all the property in the county is on the tax list and at its true value in money.

We recommend that the municipal tax rate be so limited that when combined with the State and county tax rate upon property assessed at its true value in money, it can be borne by all classes of property without being confiscatory.

If the views that we have expressed with reference to State and county tax rates are correct, what must be said about a municipal tax rate which of itself amounts to $1.50 on the hundred dollars cash value, and, combined with State and county tax rate, amounts to $2.40 on the hundred dollars value, and in some instances more than that? The municipal tax problem is the most difficult of any in connection with our tax laws to solve, and yet it must be solved before than can be an adjustment of our system of tax laws. Eighty-two million dollars of the three hundred and forty-one million dollars of the assessed value of the State are subjected to the municipal tax. The Constitution, Article VIII, sec. 4, provides: "It shall be the duty of the Legislature to provide for the organization of cities, towns and incorporated villages, and to restrict their power of taxation, assessment, borrowing money, contracting debts and loaning their credit, so as to prevent abuses in assessments and in contracting debts by such municipal corporations."

The General Assembly has no power to control the discretion of county commissioners in fixing county tax rates, unless county commissioners wish to exceed the double of the State tax, but the section of the Constitution above quoted makes it the duty of the General Assembly to limit the municipal tax rate. It is folly to talk about enforcing a tax rate of $2.40 on the hundred dollars actual cash value of property which can not earn anything, or which can not earn more than four per cent per annum, or which can not earn more than six per cent per annum. There are classes of property in the State which can bear this high rate, but the greater part can not, in our opinion. The *ad valorem* tax levied on all classes of property at the same rate can never be equal in its burdens, but, if the rate is low, it may not be oppressive, and it can then be enforced. What, then, is the natural limit of the *ad valorem* tax? We are of the opinion that the framers of our Constitution were right in fixing it at 66 2-3 cents on the hundred dollars value, and that certainly it should not be as high as the rate now prevailing in the principal cities and towns of the State. The effect of a tax rate of one dollar on the hundred dollars value is to tax all incomes from property which can not earn more than six per cent per

annum, 16 2-3 per cent, and from property which can not earn more than four per cent per annum, 25 per cent. No government—State, county or municipal—has ever attempted to do this directly, so far as we know. If there is no other remedy, would it not be more equitable and just to reduce this tax and add to the present income tax? The present income tax requires payment of 1 per cent of so much of the income as is in excess of $1,000. In other words, $1,000 of income is exempt from taxation, and the rate on the excess is one per cent. The levy of one dollar on the hundred dollars value, under our present law, requires the payment, as we have seen, of 16 2-3 per cent of incomes from one class of property, and of 25 per cent on incomes from another class of property, and so on, *without any exemption.* The law can not be enforced where the tax rate is so high. The percentage of personal property becomes less as the rate is increased.

The Comptroller of Tennessee, in his report for 1901, gives the following table, showing the assessed value of real and personal property of the Southern States for the year 1899:

Name of State.	Assessed Value of Real Estate, Excluding Railroad Property.	Assessed Value of Personal Property, Excluding Railroad Property.	Ratio of Personal Property to Whole.
Alabama	$111,895,960	$99,955,474	47.18
Arkansas	109,764,933	56,638,746	34.63
Florida	59,177,137	15,338,355	20.58
Georgia	235,410,751	137,516,326	36.87
Kentucky	447,681,753	115,646,933	20.53
Louisiana*	195,483,713	92,936,160	32.22
Mississippi	113,210,931	48,258,651	29.90
Missouri	749,131,032	210,165,875	22.01
North Carolina	156,609,650	78,343,719	33.34
South Carolina	101,109,469	48,655,933	32.49
Tennessee	271,021,726	37,693,230	12.21
Texas	587,216,258	263,652,648	30.98
Virginia	311,584,460	115,555,754	27.05
West Virginia	149,898,172	56,158.736	27.25

*The Louisiana figures include railroad property not used in the business.

We do not know why the State of Alabama shows so much greater percentage of personal property than any other State. The Constitution of Alabama limits the municipal tax rate to fifty cents on the hundred dollars value—this may be the explanation. We believe that if our Constitution had limited the municipal tax rate, or if it had been limited by the charters of the municipalities to fifty cents on the hundred dollars value, there would be a much larger per cent of personal property in

our State than appears from the above table. How can these recommendations be effected and at the same time the necessary amount of revenue for State, county and municipal governments be raised? This high tax rate results from the laws which require the principal part of the revenue for State, county and municipal purposes to be derived from the same source, to-wit, the general property tax. The remedy that would most naturally suggest itself, therefore, is that the source of revenues for the different governments be segregated or separated.

STATE TAX.

We think that it would be practicable to obtain the revenue for the general State and pension purposes from taxes on incomes, franchises, inheritances, and such license as should be paid into the State Treasury, and thereby the burdens of taxation would be more equitably and justly distributed, and we therefore recommend that this be done.

The principle of income taxation was adopted by our State in 1850, and was in form of a tax on incomes from interest-bearing securities, from stock in corporations, and from salaries and fees, and it was then, as it is now, and as we suggest it be made, a tax levied for the purpose of State revenue. The law seems to have been obeyed by tax-payers, and the revenue from it increased from year to year. The Comptroller's report for the fiscal year ending September 30, 1860, shows that the income tax for that year was $114,072.33, out of the total State tax of $696,763.10. Approximately, then, one-sixth of the whole State tax was derived from tax on incomes from these sources. Since 1868, the law has yielded but little revenue—no incomes were listed that were derived from property that was taxed, and thus nearly all the incomes were excepted.

If no *ad valorem* tax was levied for State purposes, all incomes could be taxed. We think that section 3, Article V, of the Constitution, means that no tax can be levied on incomes when the property from which the income is derived is taxed *for that purpose.* The General Assembly, in levying the *ad valorem* tax for each year, specifies the purpose for which the tax is levied, as required by Article V, section 7, of the Constitution. For example, the tax levied for this year is twenty-one cents on the one hundred dollars value for general State purposes; four cents on the one hundred dollars value for pension purposes; and eighteen cents on the one hundred dollars value for school purposes. If

no tax had been levied on property for general State and pension purposes, but a tax had been levied on property for school purposes, the General Assembly could levy a tax on the incomes derived from property as well as all other incomes for general State and pension purposes. We believe that a tax of five per cent on net incomes of individuals and corporations alike, subject to proper exemptions for subsistence, would bring sufficient revenue to meet the usual appropriations for State and pension purposes and pay the deficit for the last two years. We have no definite account of incomes except of such as were listed last year, and of net earnings of railroads in the State. Five per cent of $2,000,000, which was about the amount of incomes listed for the year 1901, would yield $100,000, against $20,000 from that source last year, and five per cent of $6,000,000, which is approximately the net earnings of railroads for the year ending June 30, 1901, would yield $300,000, against about $108,000, which the railroads paid last year for State purposes. Certainly incomes from all other sources in the State ought to be more than four times as much as from these two sources.

We have already referred to the income tax law in force in 1860. The Comptroller's report for that year shows that a tax of four per cent of net interest received or accrued and due by solvent debtors during the preceding year, yielded $84,952.25. An easy calculation will show that there was in the State at that time $35,396,766 of interest-bearing securities. With all the increase in population and wealth in the State, there has never been so much solvent credits listed for taxation since 1868. The amount of solvent credits listed in 1900 in the State was $21,963,056 and State tax was $46,690.99, and that was an increase over previous years. In 1860, the amount of interest received or accrued was discovered in the same manner and by the same method that solvent credits were discovered in 1900, namely, by the declaration under oath of the tax-payer, but the difference consisted in the rate. In 1860, the rate was 4 per cent, or $4 out of every hundred of net interest received or accrued; in 1900, the rate in effect was not less than 10 per cent, or $10 out of every hundred received or accrued anywhere in the State, and in many places in the State was 40 per cent, or $40 out of every $100 of certain classes of property, and 60 per cent, or $60, out of every $100 of other classes of property, and the highest rate prevailed in places where most of this class of property is supposed to have its situs for taxation.

We here give the amount of the tax paid on account of solvent credits by four counties of the State in the years 1860 and 1900, respectively:

County.	1860.	1900.
Wake	$5,939.80	$1,817.18
Mecklenburg	2,813.18	2,092.77
New Hanover	956.48	488.06
Guilford	2,119.89	1,596.81

The tax rate, as above stated, was 4 per cent of net profit in 1860, and no county, city or town tax was added. The tax rate in 1900 was 25 cents on the hundred dollars value, and county, city or town taxes were added, which, in many cases, made the combined rate as high as $2.40 on the hundred dollars value.

An income tax will be within the ability of the tax-payer. There will be no necessity for levying an exorbitant tax in order to raise the necessary revenue, and no General Assembly will ever pass an oppressive income tax law; it will be uniform and equal on all individuals and corporations. It will stimulate industry and enterprise. It is not a tax upon industry and enterprise unless they succeed and are able to pay, and then they should be willing to pay. There may be some difficulty in working out at first satisfactory details for the assessment and collection of this tax, but it can be done.

It has been said by another of the income tax: "It is the fairest tax ever devised; it places a heavy burden when and where there is strength to bear it, and lightens the load in case of temporary or permanent weakness. Large property does not always imply ability to pay taxes, as taxes should come from income; even when assessed on property, it is only an indirect device for estimating income. An income tax spares the business man in season of distress and helps him to weather the storm, but asks a return for the consideration shown in days of increasing prosperity."

FRANCHISE TAX.

There are a great number of corporations, domestic and foreign, doing business in this State. A reasonable tax upon the franchise of the one and upon the privilege of doing business by the other, would raise considerable revenue, and revenue from this source, with some exceptions, should be paid into the State Treasury. This is an important source of revenue of many of the States.

North Carolina State Library
Raleigh

THE INHERITANCE TAX.

North Carolina was one of the first States in the Union to adopt a collateral inheritance tax law. (See Laws 1846, chap. 72.) The amount of revenue from this source increased from year to year, and in 1860 formed a substantial part of the State's revenue. This law seems not to have been enforced after 1868, and in 1883 was omitted from the Revenue Law. It was re-enacted in 1897 and in 1901. It is now confined to personal property. It is now a very popular form of taxation. It has been adopted in a majority of the States, and is a law in other countries. It was enacted in the State of New York in 1887, and the last Comptroller's report shows that one-fourth of the revenue for State purposes was derived from this tax last year.

We recommend that the law be amended so as to include real estate as well as personal property. If this is done, it will in a few years, no doubt, yield a considerable revenue.

LICENSE TAX.

There are certain license taxes which in some proportion at least should go into the State Treasury, and in this class the revenue which is derived from liquor traffic should be included. By means of a dispensary in South Carolina, considerable revenue is brought into the State Treasury; by means of a license tax on distilleries and rectifying establishments, and on saloons, in Virginia and Tennessee, a large revenue accrues. In some way our State ought to have more revenue from this source. This tax ought to very materially supplement the revenue for State purposes. We do not mean that this is the only license tax, but one, it occurs to us, that should be utilized.

COUNTY TAX.

The general property tax relieved of the burden of taxes for State and pension purposes, will be in much better shape for revenue for schools, counties and municipal purposes. There can not be much difficulty about county revenue. As we have seen, twenty counties now derive sufficient revenue from a rate of 23 2-3 cents on the hundred dollars value. A number of others have a rate of only a little higher. The increase in the assessments which will result from a reduction in the rate, supplemented by a part of the license taxes which now accrue

to the State, will probably enable the counties to meet their expenses without much difficulty.

MUNICIPAL TAXES.

We believe that a reduction of the rate will greatly increase assessed values in municipalities where such high rates now prevail. That property undervalued will be assessed at its value, and that property which now escapes the tax list will be put on the tax list at its true value. It does not follow that by reducing the tax rate the revenue will be reduced in the same proportion. We have seen that a lower rate in 1860, on interest-bearing securities, brought more revenue than a higher rate in 1900 on all solvent credits. Reduce the tax rate so that this class of property can bear it,, and it will again appear on the tax list. If it is here and hiding to escape the oppressive tax, or if it has actually been driven away by reason of an oppressive tax, it will come back.

The business centres are the natural places for this class of property to be. The fact is, that revenue from this class of property has increased in many counties somewhat in proportion to other property where these high rates do not prevail. For example:

	1860.	1900.
Robeson County	$326.54	$633.34
Richmond County	652.09	990.49
Catawba County	608.36	963.29
Cleveland County	411.89	892.49

The distribution of railroad property which is made under our present law for purpose of municipal taxation is not fair to the municipalities, nor to the other tax-payers in them. They should have the benefit of taxes on all depots, shops, side-tracks, and other property, real and personal, which is situated within them, as well as the *pro rata* of main track, rolling-stock, and franchise. There is necessarily very little main-line mileage of railroads in the municipalities, because their limits are contracted. In most of the other States, municipalities are permitted to tax property of the classes mentioned above.

This is true also of express companies, telegraph companies and telephone companies.

The general property tax for municipal purposes should be supplemented by taxes on trades, professions, and by all business licenses. A number of these are now set apart for State purposes exclusively.

The franchise tax on street car companies, electric light and gas companies, and water-works companies might also be separated for the purposes of the municipality in which they are siuated, at least temporarily. From these and other sources which will occur to municipal officers, the present high property tax rate can be greatly reduced.

Respectfully submitted,

FRANKLIN MCNEILL, *Chairman,*
SAM. L. ROGERS, *Commissioner,*
D. H. ABBOTT, *Commissioner,*
Of State Tax Commission.

PART II.

STATEMENT No. 1—*Showing Totals of Abstracts of Listed Taxables Received from Counties for the Year 1900.*

	Valuation.		Amount.
27,197,031 acres of land	$115,736,778	21⅔c. on every $100	$250,763.02
107,665 acres mineral, quarry	878,207	do	1,902.78
82,149 town lots	50,753,643	do	109,966.22
Total valuation of real estate	167,368,628	Total tax on real estate	362,632.02
